

For all Information Management Needs

Information storage and management is a vital component of the publishing value chain. Publishers face the challenge of storing heavy volumes of information. The information usually exists in the form of images, photographs, text and so on and the storage and maintenance costs are usually very high. To help you address these challenges, Tegra brings to your table a new and truly unique service

FROM PAPER TO LESS PAPER TO PAPERLESS

TegraStore

What is TegraStore?

TegraStore is a comprehensive information management solution that allows you to host, store and retrieve your information. The framework has rich functionality and allows you to directly manage the information. It helps you realise the best benefits of an information management investment. This can be extended to other wings of your organisational ecosystem such as HR, Finance, Marketing and so on.

Key Highlights

- Secured access to Web and FTP interfaces
- SAN storage devices for large information
- Data redundancy with extensive mirroring
- Fail-safe technology for DRP and BCP
- Firewalls and up-to-date antivirus
- Frequent virus signatures
- Data privacy and confidentiality
- Costs proportional to usage
- Discounts proportional to volume
- Free training manual

About Tegra

Tegra Premedia is a comprehensive provider of premedia services with a sole objective of providing value-added, top notch services to global publishers. Tegra strives to provide best of breed information management services to global publishers in addition to our trusted premedia services. Tegra can create dedicated image banks, content buckets and pages for archiving, storage and retrieval. Your information is safe, redundant and genuine.

Construct...

The technical framework based on

- Volume of information
- Nature of the files - Image or Text
- Frequency of retrieval
- Front end interfaces - Web or FTP
- The number of users

Convert...

The information to genuine format

- Scan and prepare digital files
- Digital files in crisp and editable format
- Colour correct and repurpose images
- Scan and reproduce content
- Research and update content

Control...

The entire repository continuously

- Secure and Dual access - Web and FTP
- Web for manual upload and download
- FTP for automated transactions
- On-going audit of information
- Detailed reporting of all transactions

Information is a source of learning. But unless it is organised, processed, and available to the right people in a format for decision making, it is a burden, not a benefit.

- William Pollard
